

The Easiest way to create a PDF!

THE 100% ITALIAN SOFTWARE THAT:

- Creates a pdf from any Windows printing process
- Visualises in Acrobat
- Manages your pdf database
- Allows you to remove pages from the final pdf
- Sends the final pdf via email with a chosen name (*)
- Manages external exe o dll applications (*)
- Manages protections over 40 bit (*)
- Queues prints on a single pdf (*)
- Function scan to pdf (*) **new feature 2010**

WHY SHOULD YOU CHOOSE FACILE!PDF?

This product allows you to print a number of documents, even from different applications, and to create a single PDF.

It is not a simple print driver, it is an extremely effective and easy-to-use PDF composition tool.

You can change the name of the file before attaching it to the mail!

If your software generates a print whose name is unsuited, there is no need to save the file, name it again and only then attach it to the mail: you can perform all those steps with a single one!

(*) **business version only**
